CIRCULAR TO PARENTS- (FORENOON & AFTERNOON)

ISRO SPACE ROBOTICS PROGRAM

Dear Parents and Students,

We are thrilled to announce a landmark collaboration that brings the prestige and expertise of the **Indian Space Research Organization (ISRO)** to our student community. We present the **ISRO Space Robotics Program**, a specially designed curriculum for students from **KG to Grade 12**.

This is a rare chance for your child to learn from the minds that power India's space ambitions and ignite a passion for science, technology, engineering, and mathematics (STEM).

Program Highlights:

- **Curriculum by ISRO:** A structured, age-appropriate curriculum designed by ISRO experts.
- **Hands-On Learning:** Students will engage in practical, interactive sessions on robotics and space technology.
- **Skill Development:** Fosters critical thinking, problem-solving, creativity, and teamwork.
- **Nominal Fee:** The program is offered at a highly subsidized, nominal fee 100 QR to ensure it is accessible to all interested students.

A Unique Community-Driven Learning Model

The duration and depth of this program are directly linked to our collective participation, making this a truly unique opportunity.

We have two potential scenarios, and **your enrollment will decide the outcome:**

Scenario	Student Participation	Program Duration	Outcome for Your Child
Scenario A	If we achieve MORE than 1000 enrollments	Extended 3 Months Training for 100 QR only	In-depth, comprehensive learning with extensive hands-on project work, all for the same nominal fee.
Scenario B	If we have LESS than 1000 enrollments	Standard 1-Month Training for 100 QR	A foundational, introductory module on space robotics.

As you can see, by enrolling, you are not just registering your child, but you are actively helping to **unlock a far more extensive and valuable 3 month program for every participant.**

Curriculum and projects attached below.
